

# MOOD XMAS EVENT 3.0: LAUNCH OF THE GENERIC PLATFORM

*The MOOD platform is an integrated Epidemic Intelligence platform to support the detection, monitoring, and risk assessment for airborne, vector-borne and waterborne diseases, antimicrobial resistance, and new diseases.*

14th December 2022 | 1–3 pm CET |  Online | Upon Invitation

The MOOD developers will present the first version of the generic parts of the platform: Module 1 Data and Covariates Access and Module 2 Event Based Surveillance, following an interactive demonstrations with the participants.
